What is Agile?

We are uncovering better ways of developing software by doing it and helping others do it.

Through this work we have come to value:

Individuals and interactions over processes and tools

Working software over comprehensive documentation

Customer collaboration over contract negotiation

Responding to change over following a plan

That is, while there is value in the items on the right, we value the items on the left more.

The Team

- What does it take to be a team?
- What is the difference between a group and a team?

Working on Agile Teams

- Do agile teams differ from ordinary ones? If so, how?
- What are the characteristics of agile teams?
- How do we become effective members of agile teams?

Thank you for your attention!
